**Semiduality of Small Sets of Analytic Functions**

CMFT 2 No.1 (2002), 113–135. [ISSN 1617-9447]

**Abstract.** We give some applications of normality criteria to the question of semiduality of sets of analytic functions consisting of two elements.

**Keywords.** Semiduality, duality, gap power series, convolution, Hadamard product, Cartan's Theorem, normal families.

**2000 MSC.** 30B10, 30D45.

**Received.** October 10, 2002.
