**Approximation of Univalent Functions by Compositions**

CMFT 3 No.2 (2003), 485–499. [ISSN 1617-9447]

**Abstract.** In this paper we consider the problem of approximation of holomorphic univalent functions by compositions of the Pick functions. For functions  $f$  in the class  $S$  of univalent holomorphic functions in the unit disk normalized by  $f(0) = f'(0) - 1 = 0$ , an estimate of the rate of approximation by means of compositions is obtained.

**Keywords.** Univalent functions, composition, approximation, Loewner-Kufarev equation.
