**Constructing Interpolating Blaschke Products  
with Given Preimages**

CMFT 7 No.1 (2007), 43–54. [ISSN 1617-9447]

**Abstract.** We give a constructive and flexible proof of a result of P. Gorkin and R. Mortini concerning a special finite interpolation problem on the unit circle with interpolating Blaschke products. Our proof also shows that the result can be generalized to closed curves other than the unit circle.

**Keywords.** Finite interpolation problem, finite Blaschke product, harmonic measure, monotonicity.
