Superposition Operators on Bloch-Type Spaces

CMFT 7 No.2 (2007), 501–507. [ISSN 1617-9447]

Abstract. In this paper we characterize all entire functions that transform a Bloch-type space into another by superposition in terms of their order and type or the degree of polynomials. We also prove that all superposition operators induced by such entire functions are bounded.

Keywords. Bloch-type space, superposition operator, entire function.
