**Approximation by Translates of Taylor Polynomials of the Riemann Zeta Function**

CMFT 8 No.1 (2008), 15–19. [ISSN 1617-9447]

**Abstract.** Every function holomorphic on a compact subset of the complex plane having connected complement can be approximated by translates of Taylor polynomials of the Riemann zeta function.

**Keywords.** Riemann zeta function, universality.

**2000 MSC.** Primary 30E10; Secondary 30B10, 11M06.

**Received.** August 16, 2006.

**Published online.** March 27, 2007.
