**Asymptotic Maximum Principles
for Subharmonic Functions**

CMFT 8 No.1 (2008), 167–172. [ISSN 1617-9447]

Abstract. This note presents maximum principles for subharmonic functions, based on asymptotic behaviour, in both the Euclidean and Martin boundary settings. Several known results are generalized.

Keywords. Subharmonic function, maximum principle, asymptotic value, Martin boundary, minimal fine limit.
