Bohr Type Theorems for Monogenic Power Series

CMFT 9 No.2 (2009), 633–651. [ISSN 1617-9447]

Abstract. The main goal of this paper is to generalize Bohr’s phenomenon from complex one-dimensional analysis to the three-dimensional Euclidean space in the framework of quaternionic analysis.

Keywords. Spherical monogenics, homogeneous monogenic polynomials, Bohr’s Theorem.
