Preface	vii
0 Preliminaries	1
0.1 k-spaces	1
0.2 Arrows	4
0.3 Cofibrations and telescopes	6
I FIBRATIONS	9
1 General theory of fibrations	11
1.1 Hurewicz fibrations	11
1.2 Dold fibrations	19
1.3 Serre fibrations	26
1.4 Quasifibrations	29
2 Brownian classification	45
2.1 Preliminaries	46
2.2 Equivalence classes of fibrations	48
2.3 Classification of grounded fibrations	53
2.4 Classification of fibrations	56
3 Classifying spaces and fibrations	61
3.1 The Dold-Lashof construction	61
3.2 Classification of F -fibrations	65

4	The Milgram-Steenrod construction	73
4.1	Enlargements and Contractions	73
4.2	Enlargements	78
4.3	The construction	82
4.4	Cellular structures	87
II	\mathcal{F}-FIBRATIONS	89
5	\mathcal{F}-fibrations	91
5.1	\mathcal{F} -arrows	92
5.2	Functional arrows	95
5.3	Dold's theorem for \mathcal{F} -arrows	100
5.4	\mathcal{F} -fibrations	103
5.5	Numerable \mathcal{F} -fibrations	108
5.6	Categories of fibres	109
6	Classification of \mathcal{F}-fibrations	113
6.1	Principal arrows	114
6.2	Equivalent classifications	120
6.3	Criteria for universality	123
7	Universal \mathcal{F}-fibrations	131
7.1	Dold-Lashof revisited	131
7.2	Modified Dold-Lashof construction	133
7.3	Applications	140
8	Gottlieb theorems for \mathcal{F}-fibrations	143
8.1	Total spaces of universal \mathcal{F} -fibrations	143
8.2	Spaces of self \mathcal{F} -equivalences	147
	Bibliography	151
	Index	157
