

Contents

Preface	5
1 Preliminaries	11
1.1 The Concept of a Graph	11
1.2 Graph Labellings	14
1.3 Complete Graph Decompositions	18
2 Graph Chessboards	25
2.1 Definition of a Graph Chessboard	25
2.2 Simple Chessboard	26
2.3 Double Chessboard	31
2.4 Dual Chessboard	35
2.5 M -chessboard	37
2.6 Twin Chessboard	38
2.7 Counting Labelled Graphs	40
2.8 Labelling Distance of Trees and Graceful Index	42
2.9 Complete Graph Decomposition on a Chessboard	45
3 Labelling Sequences and Relations	49
3.1 Definition of a Labelling Sequence	49
3.2 Operations with Labelling Sequences	51
3.3 Labelling Sequence of a Connected Graph	52
3.4 Generalized Labelling Sequence	56
3.5 Labelling Relations	58
3.6 Algorithms on Labelling Relations	60

4	Some Classes of Gracefully Labelled Graphs	65
4.1	Stars	65
4.2	Double Stars	67
4.3	Paths	70
4.4	Caterpillars	72
4.5	Firecrackers	74
4.6	Cycles	77
4.7	Fan Graphs	81
4.8	Ladders	82
4.9	Simple Chains	85
4.10	Complete Graphs	87
4.11	Complete Bipartite Graphs	88
5	Constructions of Gracefully Labelled Graphs	91
5.1	Random Graceful Graph Generation	91
5.2	Free Δ Construction	95
5.3	Δ Construction	106
5.4	Generalized Δ Construction	111
6	Trees with Perfect Matching	115
6.1	State of the Art	115
6.2	Lobsters with Perfect Matching	116
6.3	Perfectly Graceful Labelling	119
7	Graph Processor	133
7.1	Description of the Computer Program	133
7.2	Examples of Applying the Program in Practice	136
7.3	Computer Program for Testing Instances of the GCT	145
	Bibliography	150
