PROCEEDINGS AND SEMINARS

- I. *Catégories non-abéliennes. Séminaire de Mathématiques Supérieures* 10 (Été, 1964). Les Presses de l'Université de Montreal, Montreal, Que. (1967).
- Hilton, P. J. *Catégories non-abéliennes*.
- Ganea, T. La suspension en homologie et homotopie.
- Kleisli, H. Comparison de la résolution simpliciale à la bar-résolution.
- Maranda, J.-M. *Catégories multiplicatives et catégories primitives*.
- Osborn, H. A. *Structures différentiables*.
- II. *Proceedings of the Conference on Categorical Algebra*, La Jolla, Calif. (1965). Edited by S. Eilenberg, D. K. Harrison, S. Mac Lane and H. Röhrli. Springer-Verlag, Berlin–New York (1966).
- Lawvere, F. W. The category of categories as a foundation for mathematics.
- Gray, J. W. *Fibred and cofibred categories*.
- Linton, F. E. J. *Some aspects of equational categories*.
- Freyd, P. *Representation in abelian categories*.
- . *Stable homotopy*.
- . *Splitting homotopy idempotents*.
- Faber, R. and P. Freyd. *Fill-in theorems*.
- Auslander, M. *Coherent functors*.

Isbell, J. R. Epimorphisms and dominions.
 Engeler, E. Categories of mapping filters.
 Hilton, P. Correspondences and exact squares.
 Sonner, J. Canonical categories.
 Wyler, O. Operational categories.
 Give'on, Y. Transparent categories and categories of transition systems.
 Watts, C. E. A homology theory for small categories.
 Barr, M. and J. Beck. Acyclic models and triples.
 Barr, M. Cohomology in tensored categories.
 Heller, A. Extraordinary homology and chain complexes.
 Dickson, S. Direct decomposition of radicals.
 Chase, S. U. Abelian extensions and a cohomology theory of Harrison.
 Walker, C. L. and E. A. Walker. Quotient categories of modules.
 Eilenberg, S. and G. M. Kelly. Closed categories.

III. Reports of the Midwest Category Seminar. I. *Lecture Notes in Mathematics* 47. Springer-Verlag, Berlin-New York (1967).

Bénabou, J. Introduction to bicategories.
 Dold, A., S. Mac Lane, and U. Oberst. Projective classes and acyclic models.
 Davis, R. Equational systems of functors.
 Isbell, J. R. Normal completions of categories.
 Roos, J. E. Locally distributive spectral categories and strongly regular rings.

IV. Reports of the Midwest Category Seminar. II. Edited by S. Mac Lane. *Lecture Notes in Mathematics* 61. Springer-Verlag, Berlin-New York (1968).

André, M. On the vanishing of the second cohomology group of a commutative algebra.
 Buchsbaum, D. A. Homology and universality relative to a functor.
 Lawvere, F. W. Some algebraic problems in the context of functorial semantics of algebraic theories.
 Knighten, R. L. An application of categories of fractions to homotopy theory.
 Dubuc, E. Adjoint triangles.

V. Reports of the Midwest Category Seminar. III. Edited by S. Mac Lane. *Lecture Notes in Mathematics* 106. Springer-Verlag, Berlin-New York (1969).

Barr, M. What is the center?
 Berthiaume, P. The functor evaluation.
 Walters, R. F. C. An alternative approach to universal algebra.

- Rivano, N. S. Catégories Tannakiennes. *Lecture Notes in Mathematics* 265. Springer-Verlag, Berlin-New York (1972).
- Schubert, H. *Categories*. Springer-Verlag, Berlin-New York (1972).

PROCEEDINGS AND SEMINARS

- XIII. Théorie des topos et cohomologie étale des schémas. *Lecture Notes in Mathematics* 269-270. Springer-Verlag, Berlin-New York (1972).
Articles by: A. Grothendieck and J. L. Verdier.
- XIV. Toposes, algebraic geometry and logic. *Lecture Notes in Mathematics* 274. Springer-Verlag, Berlin-New York (1972).
Articles by: I. Bucur, J. Giraud, N. D. Goodman and J. Myhill, L. Illusie, J. Lambek, D. Scott, and M. Tierney.
