Contents	i
Introduction	iv
1 Representations and Optimality	1
1.1 Formulation and Motivation	1
1.2 Problem Representation (Approach I)	10
1.3 Optimality Conditions (Approach I)	22
1.4 Problem Representations (Approach II)	30
1.5 Optimality Conditions (Approach II)	38
1.6 Concluding Remarks	44
2 Topological and Stability Properties	47
2.1 Some Motivations from Topology	47
2.2 Stability of the Feasible Set (Approach I)	54
2.3 Structural Stability of the Problem (Approach I)	67
2.3.1 Characterization Theorem on Structural Stability	68
2.3.2 Strong Stability and Proof of the Characterization Theorem	77
2.3.2.1 Strong Stability	77
2.3.2.2 Proof of the Characterization Theorem	83
2.4 Generalized Results (Approach I)	97
2.4.1 Excisional (Topological) Stability and its Characterization for Unbounded Feasible Sets	97
2.4.2 Structural Stability and its Characterization in Case of Max- Type Objective Functions	103

2.4.3	Excisional Structural Stability and its Characterization in Case of Max-Type Objective Functions	112
2.5	Further Topological Aspects (Approaches I, II)	116
2.6	Concluding Remarks	118
3	Concepts of Iteration Procedures	121
3.1	A Procedure Based on Discretization (Appr. I)	122
3.2	Procedures Based on Subproblems (Appr. II)	134
3.2.1	First Theoretical Treatment	135
3.2.2	More Practical Treatment Based on Linearization	144
3.2.3	Second Theoretical Treatment (Appr. I in Appr. II)	147
3.2.4	Two-Level Treatment	149
3.3	A Procedure Based on Local Linearizations (Appr. III)	151
3.3.1	Introduction	151
3.3.2	Iteration Procedure and its Topological Background	155
3.3.3	Convergence Theorem	170
3.3.4	Criticism	174
3.4	Concluding Remarks	174
4	Optimal Control and Discrete Mathematics	177
4.1	Optimal Control of Ordinary Differential Equations	178
4.1.1	Introduction into the Structural Investigation	178
4.1.2	The Particular Structure and its Stability	185
4.1.3	Composite Structure; Foundations	195
4.1.4	The Composite Structure; an Unfolding	209
4.1.4.1	Modelling Theorem	209
4.1.4.2	Structural Transversality and Core Functions	209
4.1.4.3	Generalized Semi-Infinite Optimization	226
4.1.4.4	Structural Equivalences and Completeness	235
4.1.5	Composite Structural Stability; a Conclusion	244
4.1.5.1	Composite Structural Stability	244

4.1.5.2	Theorem of Completeness and Characterization	245
4.1.5.3	Concluding Remarks	250
4.1.6	Decomposite Structure and its Stability	251
4.1.6.1	Decomposite Structure	251
4.1.6.2	Decomposite Structural Stability	252
4.1.6.3	Theorem on Completeness and Characterization	254
4.1.7	Concluding Remark	255
4.2	Time-Minimal Control and Discrete Mathematics	257
4.2.1	A Problem of Time-Minimal Control and its Treatment	257
4.2.1.1	Problem Formulation	257
4.2.1.2	Problem Decomposition	258
4.2.1.3	Problem Treatment	261
4.2.1.4	Concluding Evaluations	267
4.2.2	Connections with Discrete Mathematics	270
4.2.2.1	Relations to Undirected Graphs	270
4.2.2.2	Relations to Directed Graphs	278
4.2.2.3	Relations to Random Graphs	289
4.2.2.4	Relations to Newton Methods	293
4.2.3	Concluding Remarks	298
Appendix		299
List of Figures and Tables		309
