

## Contents

|  |           |
|--|-----------|
| <b>1 Number Systems and Errors</b>                               | <b>1</b>  |
| 1.1 Introduction . . . . .                                       | 1         |
| 1.2 Number Representation and Base of Numbers . . . . .          | 1         |
| 1.2.1 Normalized Floating-point Representation . . . . .         | 4         |
| 1.2.2 Rounding and Chopping . . . . .                            | 5         |
| 1.3 Error . . . . .  | 7         |
| 1.4 Sources of Errors . . . . .                                  | 8         |
| 1.4.1 Human Error . . . . .                                      | 8         |
| 1.4.2 Truncation Error . . . . .                                 | 8         |
| 1.4.3 Round-off Error . . . . .                                  | 9         |
| 1.5 Effect of Round-off Errors in Arithmetic Operation . . . . . | 10        |
| 1.5.1 Rounding off Errors in Addition and Subtraction . . . . .  | 10        |
| 1.5.2 Rounding off Errors in Multiplication . . . . .            | 11        |
| 1.5.3 Rounding off Errors in Division . . . . .                  | 13        |
| 1.5.4 Rounding off Errors in Powers and roots . . . . .          | 15        |
| 1.6 Summary . . . . .  | 16        |
| 1.7 Problems . . . . .   | 17        |
| <b>2 Systems of Linear Equations</b>                             | <b>19</b> |
| 2.1 Introduction . . . . .                                       | 19        |
| 2.1.1 Linear System in Matrix Notation . . . . .                 | 23        |
| 2.2 Properties of Matrices and Determinant . . . . .             | 25        |
| 2.2.1 Introduction of Matrices . . . . .                         | 26        |
| 2.2.2 Some Special Matrix Forms . . . . .                        | 30        |
| 2.2.3 The Determinant of Matrix . . . . .                        | 41        |
| 2.3 Numerical Methods for Linear Systems . . . . .               | 48        |
| 2.4 Direct Methods for Linear Systems . . . . .                  | 48        |
| 2.4.1 Cramer's Rule . . . . .                                    | 48        |
| 2.4.2 Gaussian Elimination Method . . . . .                      | 51        |
| 2.4.3 Pivoting Strategies . . . . .                              | 65        |

|   |            |
|---|------------|
| 2.4.4 Gauss-Jordan Method . . . . .                                 | 70         |
| 2.4.5 LU Decomposition Method . . . . .                             | 74         |
| 2.4.6 Tridiagonal Systems of linear equations . . . . .             | 95         |
| 2.5 Applications . . . . .  | 99         |
| 2.5.1 Curve Fitting, Electric Networks and Traffic Flow . . . . .   | 99         |
| 2.5.2 Heat Conduction . . . . .                                     | 107        |
| 2.5.3 Chemical Solutions and Balancing Chemical Equations . . . . . | 109        |
| 2.5.4 Manufacturing, Social, and Financial Issues . . . . .         | 112        |
| 2.5.5 Allocation of Resources . . . . .                             | 116        |
| 2.6 Summary . . . . .   | 118        |
| 2.7 Problems . . . . .  | 118        |
| <b>3 Conditioning of Linear Systems</b>                             | <b>131</b> |
| 3.1 Introduction . . . . .  | 131        |
| Norms of Vectors and Matrices . . . . .                             | 131        |
| 3.3 Errors in Solving Linear Systems . . . . .                      | 136        |
| 3.4 Summary . . . . .   | 147        |
| 3.5 Problems . . . . .  | 148        |
| <b>4 Iterative Methods for Linear Systems</b>                       | <b>153</b> |
| 4.1 Introduction . . . . .  | 153        |
| 4.2 Jacobi Iterative Method . . . . .                               | 155        |
| 4.3 Gauss-Seidel Iterative Method . . . . .                         | 160        |
| 4.4 Convergence Criteria . . . . .                                  | 165        |
| 4.5 Eigenvalues and Eigenvectors . . . . .                          | 169        |
| 4.6 Successive Over-Relaxation Method . . . . .                     | 178        |
| 4.7 Conjugate Gradient Method . . . . .                             | 184        |
| 4.8 Iterative Refinement . . . . .                                  | 188        |
| 4.9 Summary . . . . .   | 190        |
| 4.10 Problems . . . . .   | 190        |
| <b>5 The Eigenvalue problems</b>                                    | <b>197</b> |
| 5.1 Introduction . . . . .  | 197        |
| 5.2 Linear Algebra and Eigenvalues Problems . . . . .               | 208        |
| 5.3 Diagonalization of Matrices . . . . .                           | 212        |
| 5.4 Basic Properties of Eigenvalue Problems . . . . .               | 225        |
| 5.5 Some Results of Eigenvalues Problems . . . . .                  | 242        |

|  |            |
|--|------------|
| 5.6 Applications of Eigenvalue Problems . . . . .      | 245        |
| 5.6.1 System of Differential Equations . . . . .       | 245        |
| 5.6.2 Difference Equations . . . . .                   | 252        |
| 5.7 Summary . . . . .                                  | 256        |
| 5.8 Problems . . . . .                                 | 257        |
| <b>6 Numerical Computation of Eigenvalues</b>          | <b>263</b> |
| 6.1 Introduction . . . . .                             | 263        |
| 6.2 Vector Iterative Methods for Eigenvalues . . . . . | 264        |
| 6.2.1 Power Method . . . . .                           | 264        |
| 6.2.2 Inverse Power Method . . . . .                   | 269        |
| 6.2.3 Shifted Inverse Power Method . . . . .           | 272        |
| 6.3 Location of the Eigenvalues . . . . .              | 276        |
| 6.3.1 Gerschgorin Circles Theorem . . . . .            | 276        |
| 6.3.2 Rayleigh Quotient . . . . .                      | 278        |
| 6.4 Intermediate Eigenvalues . . . . .                 | 279        |
| 6.5 Eigenvalues of Symmetric Matrices . . . . .        | 283        |
| 6.5.1 Jacobi Method . . . . .                          | 284        |
| 6.5.2 Sturm Sequence Iteration . . . . .               | 290        |
| 6.5.3 Given's Method . . . . .                         | 294        |
| 6.5.4 Householder's Method . . . . .                   | 298        |
| 6.6 Matrix Decomposition Methods . . . . .             | 302        |
| 6.6.1 QR Method . . . . .                              | 302        |
| 6.6.2 LR Method . . . . .                              | 306        |
| 6.6.3 Upper Hessenberg Form . . . . .                  | 309        |
| 6.6.4 Singular Value Decomposition . . . . .           | 316        |
| 6.7 Summary . . . . .                                  | 323        |
| 6.8 Problems . . . . .                                 | 325        |
| <b>7 Approximating Functions</b>                       | <b>331</b> |
| 7.1 Introduction . . . . .                             | 331        |
| 7.2 Polynomial Approximation . . . . .                 | 332        |
| 7.2.1 Aitken's Method . . . . .                        | 333        |
| 7.3 Least Squares Approximation . . . . .              | 337        |
| 7.3.1 Linear Least Squares . . . . .                   | 338        |
| 7.3.2 Polynomial Least Squares . . . . .               | 343        |
| 7.3.3 Nonlinear Least Squares . . . . .                | 346        |
| 7.3.4 Least Squares Plane . . . . .                    | 354        |

|   |     |
|---|-----|
| 7.3.5 Least Squares Solution of a Overdetermined System . . . . . | 357 |
| 7.3.6 Least Squares with QR Decomposition . . . . .               | 361 |
| 7.3.7 Least Squares with Singular Value Decomposition . . . . .   | 366 |
| 7.4 Summary . . . . .   | 371 |
| 7.5 Problems . . . . .  | 372 |

## **8 Linear Programming** **379**

|  |     |
|--|-----|
| 8.1 Introduction . . . . .                               | 379 |
| 8.2 General Formulation . . . . .                        | 380 |
| 8.2.1 Terminology . . . . .                              | 381 |
| 8.3 Linear programming Problems . . . . .                | 382 |
| 8.4 Graphical Solution of LP Models . . . . .            | 385 |
| 8.4.1 Reversed Inequality Constraints . . . . .          | 390 |
| 8.4.2 Equality Constraints . . . . .                     | 390 |
| 8.4.3 Minimum Value of a Function . . . . .              | 391 |
| 8.4.4 Linear Program in Canonical Form . . . . .         | 397 |
| 8.4.5 Linear Program in Standard Form . . . . .          | 398 |
| 8.4.6 Some Important Definitions . . . . .               | 402 |
| 8.5 The Simplex Method . . . . .                         | 403 |
| 8.5.1 Unrestricted-in-Sign Variables . . . . .           | 412 |
| 8.6 Finding a Feasible Basis . . . . .                   | 413 |
| 8.6.1 Big M Simplex Method . . . . .                     | 415 |
| 8.6.2 Two-Phase Simplex Method . . . . .                 | 419 |
| 8.7 Duality . . . . .                                    | 423 |
| 8.7.1 Comparison of Primal and Dual Problems . . . . .   | 425 |
| 8.7.2 Primal-Dual Problems in Standard Form . . . . .    | 427 |
| 8.8 Sensitivity Analysis in Linear Programming . . . . . | 432 |
| 8.9 Summary . . . . .                                    | 435 |
| 8.10 Problems . . . . .                                  | 436 |

## **Appendices** **447**

### **A Complex Numbers and Inner Products** **447**

|  |     |
|--|-----|
| A.1 Complex Numbers . . . . .                              | 447 |
| A.1.1 Geometric Representation of Complex Number . . . . . | 448 |
| A.1.2 Operations on Complex Numbers . . . . .              | 449 |
| A.1.3 Polar Form of Complex Number . . . . .               | 450 |
| A.1.4 Matrices with Complex Entries . . . . .              | 453 |

|  |            |
|--|------------|
| A.1.5 Solving Systems with Complex Entries . . . . . | 454        |
| A.1.6 Determinants of Complex Numbers . . . . .      | 454        |
| A.1.7 Complex Eigenvalues and Eigenvectors . . . . . | 455        |
| A.2 Inner Product Space . . . . .                    | 455        |
| A.2.1 Properties of Inner Products . . . . .         | 456        |
| A.2.2 Complex Inner Products . . . . .               | 459        |
| <b>B Introduction of MATLAB</b>                      | <b>461</b> |
| B.1 MATLAB Built-in-Functions . . . . .              | 500        |
| B.2 Symbolic Computation . . . . .                   | 502        |
| B.3 Symbolic Math Toolbox Functions . . . . .        | 519        |
| B.4 Index of MATLAB Programs . . . . .               | 522        |
| <b>C Answers to Selected Problems</b>                | <b>525</b> |
| <b>Bibliography</b>                                  | <b>548</b> |
| <b>Index</b>   | <b>549</b> |
